6347137 Methods and apparatus for requesting assistance at a self-checkout terminal

2002-02-12

The present invention provides a self-checkout terminal having input and output devices for performing a self-checkout process. The input and output devices are controlled and monitored by system software that determines, based on its monitoring of the input and output devices, whether...

6325290 Method and apparatus for checking out large items with a self-service...

2001-12-04

A method of operating a self-service checkout terminal is herein. The self-service checkout terminal has a housing, a stationary scanner secured to the housing, and a hand-held scanner having a holder associated therewith. The hand-held scanner is movable relative to the housing. The method...

6213395 Apparatus and method for operating a checkout system having a scanner which...

2001-04-10

A checkout terminal includes a terminal base. The terminal also includes a scanner movably secured to the terminal base. The scanner is configured to be moved relative to the terminal base so as to be positionable between an assisted scanner position and a self-service scanner position. The...

6189790 Method and apparatus for displaying instructional messages during operation...

2001-02-20

A method of operating a retail terminal having a display monitor associated therewith includes the step of generating an item-entered control signal when a user enters an item for purchase into the retail terminal during a retail transaction. The method also includes the step of entering a record...

6179089 Below the scanner (BTS) nesting check stand/cart system

2001-01-30

A check stand having a cantilevered scanner housing using (10) combined with a shopping cart having a cart basket bottom (16) which passes beneath the cantilevered scanner housing to create a nested check stand and cart combined system. The shopping cart having a angled drop-down front gate (20)...

6167381 Self-service checkout terminal

2000-12-26

A self-service checkout terminal includes a base having a bagwell defined therein. The terminal also includes a first counter supported on the base. The first counter has a first surface which is positioned at a first height. The terminal further includes a scanner secured at a first end of the...

6155486 Method and apparatus for operating a security system of a self-service...

2000-12-05

A method of operating a self-service checkout terminal having a scanner device for allowing a user to enter an item for purchase, and a weight scale for detecting placement of the item for purchase in a post-scan area associated with the self-service checkout terminal includes the step of...

6145629 Method and apparatus for operating a self-service checkout terminal which has...

2000-11-14

A method of operating a self-service checkout terminal having a weight scale associated therewith includes the step of generating an item-entered control signal when a user enters a first item for purchase with a code entry device. The method also includes the step of monitoring output from the...

6112857 Hand-held scanner device having a smart card associated therewith and...

2000-09-05

A hand-held entry device includes a code entry device for allowing a user to enter a product code associated with a first item of the items for purchase. The hand-held entry device also includes a smart card having (i) a processor electrically coupled to the code entry device, and (ii) a card...

6105867 Purchased commodity accommodating and transporting apparatus having self...

2000-08-22

The invention provides a purchased commodity accommodating and transporting apparatus having a self scanning function and a POS system which prevent an unjust act such as to carry out a commodity without reading a commodity code whether it is intentional or accidental. The purchased commodity...

6080938 Method and apparatus for resetting a product scale of a retail checkout terminal

2000-06-27

A method of resetting a product scale of a retail checkout terminal includes the step of detecting absence of an item on the product scale. The method also includes the step of generating an absence signal in response to the detecting step. The method further includes the step of determining a...

6056087 Method and apparatus for providing security to a self-service checkout terminal

2000-05-02

A method of providing security to a self-service checkout terminal having a bagwell and a light curtain device that generates a light curtain which is positioned over the bagwell includes the step of locating a grocery container in the bagwell. The method also includes the step of generating an...

6035971 Check out stand with telescoping take-away conveyor

2000-03-14

A check out stand (20) having a telescoping take-away conveyor (26) extending between a front module (22) and a rear module (24). Retraction of the telescoping take-away conveyor (26) allows an area located beneath the leading end of the conveyor to be exposed. The exposed area can support a...

6032128 Method and apparatus for detecting item placement and item removal during...

2000-02-29

A method of providing security during operation of a checkout terminal, with the terminal having a first scale, includes the step of storing a first identification code associated with an input item in a memory in response to entry of the input item into the terminal. The method also includes the...

5995942 Store-level marketing system

1999-11-30

The present invention relates to a store level marketing system and a unique printer to be used in the system. The store level marketing system includes an activation device for initiating use of the system and for providing the system with information about the consumer using it, a network...

5992570 Self-service checkout apparatus	1999-11-30
A self-service checkout apparatus for processing items selected by a customer for purchase includes a customer operated device, such as a scanner/scale, for identifying each item selected for purchase. The apparatus also includes a self-service terminal which includes a card or cash payment...	
5987428 Method and apparatus for checking out non-barcoded items at a checkout station	1999-11-16
A method and apparatus for checking out an item to be weighed through a checkout station. The method includes the steps of sensing when the item is positioned on a scale, and displaying a visual indication which prompts a user to initiate a specific keystroke operation in response to the sensing...	
5978772 Merchandise checkout system	1999-11-02
A merchandise checkout system in which a first scanning device is brought into service at peak times to scan the bar codes of checkout items held by waiting customers in a checkout lane. Each first scanning device is preferably a mobile unit linked with a central computer tuned to a single...	
5967264 Method of monitoring item shuffling in a post-scan area of a self-service...	1999-10-19
A method of monitoring item shuffling in a post-scan area of a self-service checkout terminal having a post-scan shelf, a bagwell with a grocery container positioned therein, and a weight scale positioned so as to detect weight of items positioned both on the post-scan shelf and in the grocery...	
5965861 Method and apparatus for enhancing security in a self-service checkout terminal	1999-10-12
A system and method of providing security during operation of a self-service checkout terminal by detecting movement of an item within a scanner zone associated with the terminal with a video system and generating a scanning-attempt control signal in response thereto. The method also includes the...	
5898158 Purchased commodity accommodating and transporting apparatus having self...	1999-04-27
The invention provides a purchased commodity accommodating and transporting apparatus having a self scanning function and a POS system which prevent an unjust act such as to carry out a commodity without reading a commodity code whether it is intentional or accidental. The purchased commodity...	
5877485 Statistical sampling security methodology for self-scanning checkout system	1999-03-02
Disclosed is the implementation of a statistical basis for use in a self-scanning checkout system for determining how many items to check in a shopper's shopping cart for incorrect or missing scans as well as which particular or types of items to check to determine if they were properly scanned...	
5752582 Self-service checkout system	1998-05-19
An automated checkout station is provided which allows a single cashier to monitor and assist multiple customers simultaneously without the requirement for a video surveillance system. The automated checkout station includes all of the features necessary for a customer to complete a transaction,...	
5739513 Automated shopping basket system with accounting using marks written on articles	1998-04-14
A system for operating shopping basket with an accounting function. Each shopping basket comprises an article registering unit, an accounting control unit (calculator), a display, an alarm, a transmitter, a receiver, and an external memory. A "valid" mark is placed upon articles to be placed in...	
5662190 Self-scanning checkout apparatus having article passage detecting sensor	1997-09-02
A self-scanning checkout apparatus for reading article information of articles to be purchased during a checkout operation carried out individually by a customer and for determining whether the check-out operation individually carried out by the customer is normal or abnormal. The self-scanning...	
5641039 Purchase checkout station	1997-06-24
To be used to checkout a plurality of items to be purchased, a purchase checkout station including a product scanner utilized to scan a bar code of the item to be purchased and obtain store and purchase information relative to the item to be purchased, a data transmission connector structured to...	
5637847 Automated shopping basket system with accounting and article tracking functions	1997-06-10
A system for operating shopping basket with an accounting function. Each shopping basket comprises an article registering unit, an accounting control unit (calculator), a display, an alarm, a transmitter, a receiver, and an external memory. The article registering unit includes elements for...	
5635906 Retail store security apparatus	1997-06-03
A security apparatus for a retail store in which each item for sale has a security tag attached thereto. A computerized database stores the approximate weight of each item for sale. During a purchase transaction, a predicted total weight of the items purchased is calculated and the items are...	
5595264 System and method for automated shopping	1997-01-21
A system and method of automated shopping, including a portable bar code scanner for scanning bar code indicia information on items selected to be purchased, securing the scanner in a holder for limited access, and releasing the portable bar code scanner upon receiving an authorized payment card....	
5584362 Check-out and bagging station and method	1996-12-17
A customer checkout apparatus for recording the prices of purchase items where the purchase items each have an item information display mechanism for storing purchase item data including purchase item price in machine readable form includes an item check-out vessel for receiving each of the...	
5560450 Self-scanning checkout device	1996-10-01
